

REINVESTING IN A COMPREHENSIVE COMMERCIAL TOBACCO PREVENTION & TREATMENT PROGRAM IS CRITICAL FOR THE HEALTH OF WASHINGTONIANS

104,000 WA YOUTH WILL DIE PREMATURELY FROM SMOKING

\$3.2 Billion in state health care costs

27% OF CANCER DEATHS DUE TO SMOKING

Restoring a comprehensive program is essential:

- for evidence-based and equity-focused prevention, education, and treatment services in all communities.
- to reduce known disparities in populations that are targeted by the tobacco industry and systemically disadvantaged.
- to protect our children, teens, and young adults from the industry's pervasive e-cigarette marketing that fuels the vaping epidemic, especially among youth of color and LGBTQ youth.

From 2000 - 2009, when WA invested ~\$23.6 million per year:

↓ Youth and adult smoking rates **5:1 ROI** healthcare costs savings

Programs to prevent youth vaping, reduce smoking disparities, and equitably provide cessation services cannot be successful without sustained investment.

Inadequate state funding from 2009 through 2022 dismantled a successful and comprehensive state program.

Renewed state support will reignite our ability to:

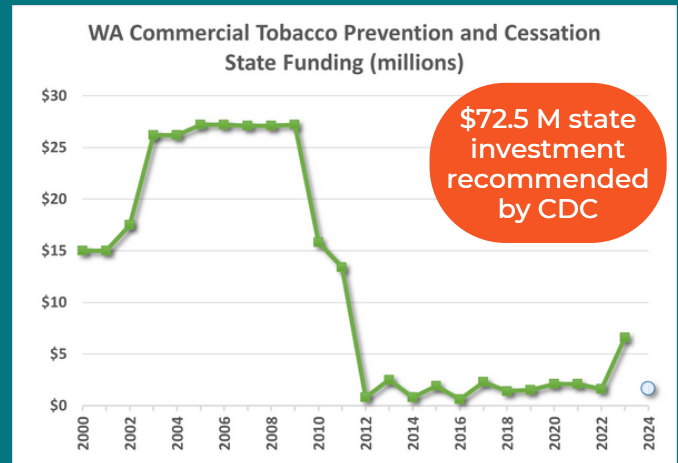

- resolve known inequities in overburdened communities,
- respond to the industry's e-cigarettes push, and
- sustain effective programs with experienced staff in every community.

Fully funding Washington's commercial tobacco prevention and treatment program is a long-term investment in our state's health and economic future.

 Advocating Together for Health

45th

WA's national rank in 2022 for state tobacco prevention funding

The Legislature's \$5.121 million FY 2023 general fund support was the first significant investment since 2010.
